## **WALL STREET BEGINS** TO SUFFER REACTION

Professional Traders and Bankers Begin Liquidation.

(By the International News Service.)
New York, Sept. 30.—The reaction that came in Wall Street today was fully explained by the bank statement that followed it. If this statement means anything it means that professional traders and bankers who have been carrying stocks on margin in the banks have liquisited and the stocks have been taken dated and the stocks have been taken by the public either for cash or on much heavier margins than they were carried the previous week. This is indicated by a comparison of the actual and surplus statements.

The actual statement shows a decrease in surplus reserves of \$34,944,560, and in-crease in loans of \$31,325,000, and an in-crease in net demand deposits of \$7,755,000. The average statement shows a decrease in surplus reserves of \$7,333,120, an in-crease in loans of \$22,453,000, and an in-crease in net demand deposits of \$31,-

Much of the liquidation by professionals toward the close of the week was due not so much to the big profits accumulated as to the earnings issued by prominent bankers. Professionals take advice from bankers much more quickly than the public does. The bankers issued these warnings with the deliberate intention of sobering the market, which was beginning to show signs of breaking all bounds. The bankers are willing to see prices much higher and in fact expect them to

much higher and in fact expect them to go a great deal above the highest record-ed in any stock, but they want the ad-vance to be orderly.

Since the entire market acted under, the same influence there is little virtue in speaking of individual stocks in a market like today's. It should be noted, how-ever, that the talk of a special Union Pacific dividend is revived again to hank-Pacific dividend is revived again in bank ng houses close to the management, The
